

## 720 GBE Fabric Access Processor

<b>Manufacturer:</b>	<a href="#">Broadcom Corporation</a>	<input type="text" value="BCM88675CB0KFSBG Image"/>
<b>Package/Case:</b>	BGA	Images are for reference only
<b>Product Type:</b>	Communication & Networking ICs	<input type="button" value="Inquiry"/>
<b>RoHS:</b>	RoHS Compliant/Lead free 	
<b>Lifecycle:</b>	Unconfirmed	

### General Description

The BCM88675CB0KFSBG is part of the StrataDNX series of network processors designed for use in carrier-grade and data center networking applications. It offers high-performance packet processing capabilities and supports advanced features for efficient and scalable network infrastructure.

### Key Features

**High-performance packet processing:** The processor provides high-speed packet forwarding and routing capabilities, enabling efficient data transmission in complex network environments.

**Integrated traffic management:** It includes advanced traffic management features such as quality of service (QoS) controls and congestion management to ensure optimal performance and reliability.

**Multi-core architecture:** The processor features a multi-core design, allowing for parallel processing and improved overall performance.

**Integrated security features:** It includes hardware-based security features like encryption and authentication to ensure data privacy and integrity.

**Scalability and flexibility:** The processor is designed to be highly scalable, allowing for easy expansion and customization to meet the specific requirements of different network applications.

### Application

The BCM88675CB0KFSBG processor is commonly used in networking equipment such as routers, switches, and data center appliances. It is suitable for a wide range of applications, including carrier-grade networks, enterprise networks, cloud computing, and service provider deployments.
