

INST Amp Single $\pm 18V$ 8-Pin PDIP Tube

Manufacturer:	Texas Instruments, Inc
Package/Case:	DIP8
Product Type:	Amplifier ICs
RoHS:	RoHS Compliant/Lead free 
Lifecycle:	Active

General Description

The INA118 is a low-power, general-purpose instrumentation amplifier offering excellent accuracy. The versatile, three op amp design and small size make this device an excellent choice for a wide range of applications. Current-feedback input circuitry provides wide bandwidth, even at high gain (70 kHz at $G = 100$).

A single external resistor sets any gain from 1 to 10000. Internal input protection can withstand up to ± 40 V without damage.

The INA118 is laser-trimmed for low offset voltage (50 μV), drift (0.5 $\mu V/^{\circ}C$), and high common-mode rejection (110 dB at $G = 1000$). The INA118 operates with power supplies as low as $\pm 1.35V$, and quiescent current is only 350 μA , making this device an excellent choice for battery-operated systems.

The INA118 is available in 8-pin plastic DIP and SO-8 surface-mount packages, and specified for the $-40^{\circ}C$ to $+85^{\circ}C$ temperature range.

The upgraded INA818 offers a lower input stage offset voltage (35 μV , maximum), lower input bias current (0.5 nA maximum) and lower noise (8 nV/\sqrt{Hz}) at the same quiescent current. See the Device Comparison Table for a selection of precision instrumentation amplifiers from Texas Instruments.

Key Features

A newer version of this device is now available: INA818

Low drift: 0.5 $\mu V/^{\circ}C$, maximum

Low input bias current: 5 nA, maximum

High CMR: 110 dB, minimum

Inputs protected to ± 40 V

Wide supply range: ± 1.35 to ± 18 V

Low quiescent current: 350 μA

Packages: 8-Pin plastic DIP, SO-8
